TECHNICAL DATA SHEET

MUSCOVITE MICA TAPE – 24GS – HQ

Mica Glass Backed Cable Tape for Fire Resistant security cables

COMPOSITION:

Muscovite Mica Tape-24GS is a **High Quality Grade** of dry and flexible insulating tape consists of high quality heat resistant calcined Muscovite mica paper bonded to a special alkali-free glass cloth on one side, impregnated with high-resistant silicone resin.

Composition of this mica tape ensure smooth High-Speed Taping process, specially for smaller conductor sections.

PROPERTIES:

- High Fire-Resistivity up to 750 - 950°C and stable performance
- Outstanding electrical insulation properties in high temperatures
- Excelent Flexibility and Tensile Strength for high-speed application
- Free of halogens and toxic gases

APPLICATIONS:

Muscovite Mica Tape-24GS is used as insulation of Fire-Resistant security cables, which are tested according to required standards. The tape is applied around the conductors with the mica side on copper and provide a protection barrier to ensure function of cables in case of fire.

STORAGE:

Min. 12 months under standard storage conditions in original packing (20°C)

Type	Unit	FR80M24-HQ
Thickness	mm	0.110 +/- 0,02
Weight of Tape	g/m2	124 +/- 10
Mica content	g/m2	80 +/- 5
Glass Content	g/m2	24 +/- 2
Binder content	g/m2	20 +/- 4
Breakdown Voltage	KV/Layer	≥ 1.3
Tensile Strength	N/10mm	≥ 100
Fire Grades	°C	750 - 950 °C

TECHNICAL DATA SHEET

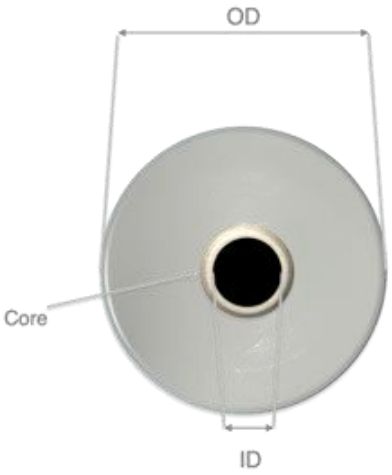

MUSCOVITE MICA TAPE - 24GS - HQ

Mica Glass Backed Cable Tape for Fire Resistant security cables

AVAILABILITY:

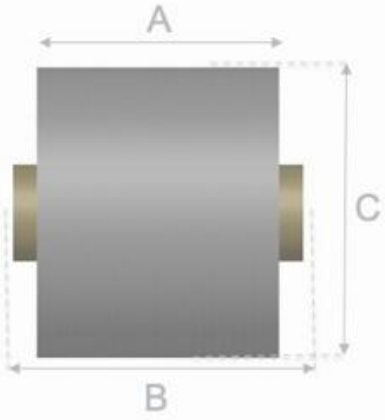

Pads/Rolls

Tape Width:	from 5mm up to 1000mm
Standard Cores ID:	76mm; 120mm (other dimensions on request)
Standard Pad OD:	80-600mm (other dimensions on request)
Core:	Plastic or carton

Traverse Wounded Spool (TWS) or Step to Step Spool (STS)

Tape Width:	from 4mm
Standard Cores ID:	76mm
Standard Spool OD	C = up to 300mm
Standard Spool Width	A = up to 300mm
Core:	Plastic or carton
